

What's Possible – Improving and Simplifying Your Planning and Preparation

Fusion Framework makes new efficiencies in planning and preparation possible with unique capabilities that allow you to build a true plan management infrastructure where your core team's expertise can be efficiently and effectively shared across diverse plans through a plan procedure library, while still allowing each department to customize what is important to them.

Establish an Effective and Efficient Plan Management Capability

Develop consistent plans year after year with a guided path that give instruction each step of the way. Train new resources at any time with minimal effort. Occasional users will know what to do with minimal guidance.

Ensure Plans are Current, Accurate, and Actionable

Fusion's Plan Management infrastructure, including the Plan Procedure Library, will accelerate your planning process and create more consistent and higher quality actionable plans. This keeps you in command and control and provides you the most flexible ways to automate approvals and push changes out to all plans.

Ensure Standards are Met While Allowing for Departmental Flexibility

With Fusion you have the most powerful plan management infrastructure, including the Plan Procedure Library. Have complete control over the planning environment. Change plans in one place if something evolves. Give people flexibility to make specific changes to their department as they also adhere to standards.

Define Sequence of Activities to Ensure Plans are Executed Properly

Fusion enables you to define dependencies between procedures and tasks within and across plans. This ensures that at critical moments, tasks can be executed as rapidly as possible without starting any task out of sequence. Identifying dependent plan procedures is easy when everything is based in a strong Information Foundation.

Automate the Plan Maintenance Reminder Process

Stop spending time sending email reminders to your plan owners to update their plans. Fusion Framework's automated alerts allow you to set the schedule once. From then on, plan owners will get maintenance reminders until their updates are complete during each cycle. Reminders can be set as often as you desire.

Render Plans in Multiple Formats to Suit Different Purposes and Audiences

By putting your plan information in Fusion Framework, you will be able to create targeted plan documents that serve different needs. Plans for a department may be very different from plan documents needed for auditors. Generate what you need from the same data for different purposes.
