Added Value of Automating Invoice Payments

Smarter Financial Decisions Thanks to Real-Time Data

MineralTree gives users real-time visibility into their financial data, greater control over the invoice to pay process and up to the minute reporting of outgoing cash flow.

Improved Security, Less Risk and Fraud

MineralTree offers two-factor authentication, payment limits, bank positive pay, and segregation of duties to ensure security. Plus, MineralTree provides online fraud loss protection up to \$100,000 per year.

Increased Efficiency

Automating processes that are typically manual such as entering invoice data, acquiring approvals, and printing checks, improves efficiencies by greater than 50%. Add to that, the ability to approve and authorize payments from your mobile device, and AP has never been easier or more convenient.

Better Vendor Relationships

MineralTree supports multiple payment methods including ACH, virtual card, or check. More payment options lets you ask your vendors "What is your preferred payment method?" Plus, automated, scheduled payments ensure you are never late and gives you the time to build relationships and negotiate better terms or discounts.

MineralTree provides the easiest to use Accounts Payable and Payment Automation solutions for finance professionals at growing organizations. If you are interested in learning more, please contact us at sales@mineraltree.com, or visit us at www.mineraltree.com.
