

## Gain a Comprehensive View *Integrated Risk Management*

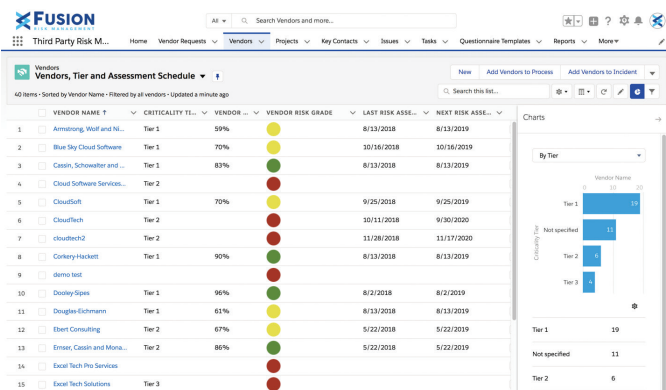

### Discover What's Possible with Fusion

Risks are constantly evolving with new risks developing all the time. Assessing, treating, and monitoring risks in a comprehensive program is no longer feasible in spreadsheets and static documents. Create one information foundation that spans all areas of risk and business continuity management to build a truly integrated program. With a comprehensive software solution that provides efficiency, effectiveness, and clear ROI, you can discover new possibilities and achieve new levels of program success.

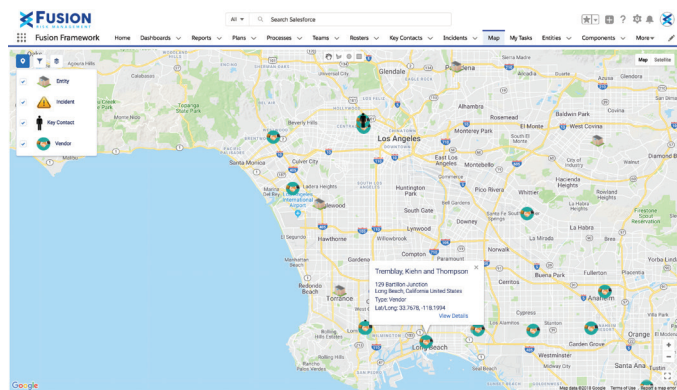

# Visibility Across All Risks

## Third-Party/Vendor Risk

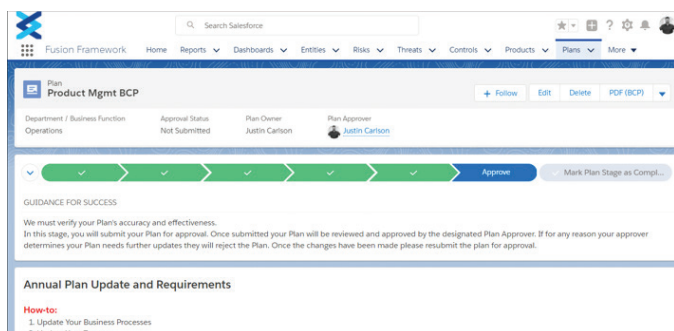

Unify third-party management with an integrated approach. The Fusion Framework System captures data from across your organization, producing powerful metrics about performance, risk, and compliance. Understand how third parties impact your organization's supply chain and its ability to meet obligations.

## Facility/Site Risk

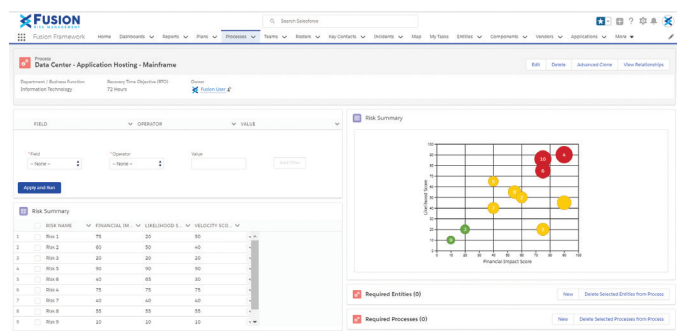

The Fusion Framework System integrates risk and business continuity, creating a comprehensive facility risk management program customized to your needs. Reduce the likelihood of incidents and monitor and manage resiliency to reduce the impact of a disruption.

## Cyber/Digital Risk

Identify digital risks before they are exposed and exploited. With the Fusion Framework System, you measure and manage key risk indicators for IT operations to understand your digital risk profile from a business process perspective. Make better decisions, and balance the need to protect your organization with the need to run the business. The Fusion Framework provides robust incident planning and response capabilities.

## Operational Risk

Operationalize risk management through a comprehensive set of tools, automated workflows, visualization, and data analytics.

The Fusion Framework is adaptive, allowing you to preserve proven methodologies and historical data to ensure you create the most effective, efficient, and economical risk management program for your organization.
