

What's Possible – Engaging the Enterprise

Fusion Framework provides you a complete solution to engage the entire enterprise. Share important information in a secure and accessible way and receive input from anyone. Mobile access will put you in command and control and give the entire organization the best chance for success in any situation.

Provide Mobile Access to Plans and Information to Improve Outcomes

Get access to a complete mobile application to contribute and receive data anywhere and anytime. Fusion has the most complete mobile interface available, including access to custom fields, reports and dashboards. Views that fit the needs of occasional users makes access to plans and critical information easy with no specific training. Reach the entire organization with a secure interface that will improve engagement and result in better outcomes.

Enable Employees to Report Situations from Anywhere

Enable anyone in the enterprise to report situations from the field back to your incident command center. Speed response to unfolding situations with an app to report things that can keep the organization safe and operational. Create a two-way dialog and permanent record. Attach photos and documents as needed to further understand potential impact.

Enable Distributed Users to Approve Plans and Participate in Exercises

Put the approval process right in the hands of executives on their mobile device and get timely responses. Email alerts and links take them right to the document to review, comment on and approve. Incident participants can also connect from their mobile device with no loss in functionality. Full access to incident dashboards, task lists, plans are all available.

Tailor the User Experience to Engage Users with Diverse Requirements

Create engaging user experiences for your constituents so they can contribute and consume information regularly. With better engagement you will build an accurate information foundation that is core to your success. Present users with only the information that is relevant to them. The intuitive and consistent user interface makes working with the system engaging so they come back regularly. Single sign-on and workflows make a typical end-user experience as simple as clicking through a link in an email to go directly to the Fusion Framework page they need to access and quickly complete the required task. There is no limit to the number of different roles you can define. Tailor the experience for each role with clicks and not code.
