

The CardioCare Program Improves the Patient Care Pathway

Patients Meeting Severe AS Criteria¹

Median of 12 Risk Share Qualifying Sites

Generating a measurable impact across the patient care pathway

1. Analysis represents aggregate median risk share performance across 12 qualifying sites. 2. Based on AHA/ACC guidelines. 3. Therapy plan encompasses medical management, palliative care, or other medical procedures (surgical or transcatheter). Some patients recently diagnosed may not have had enough time to receive a defined therapy plan.
