What's Possible – Management, Governance and Compliance of your Program

Fusion Framework provides you a set of flexible tools to manage your program efficiently and become known for being able to deliver an efficient and responsive program that keeps people involved.

Deliver Reports and Dashboards That Provide Invaluable Insights

Create tailored reports easily for each user's needs. Exception reports and dashboard as let you focus on the places data is incomplete or changes are required. Use the drag-and-drop report builder and easily create powerful views with minimal effort. Format Pie, Bar, Line, Table, Gas Gauge or Funnel charts. Easily try out different chart types to find the most effective views.

Efficiently Package Data Analytics to Support Better Decision Making

Share data with any system through multiple techniques including importing and exporting. Interactive dashboards make powerful statements during presentations without any transcribing to other formats. Deliver reports and dashboards automatically by subscribing users to remove manual effort. Delegate report creation to less senior employees.

Automatically Manage Your Teams and Contact Information

Manually updating your teams is time-consuming. Fusion allows you to automate the management of team changes. You create rules to manage Team membership. The Team Membership Refresh Jobs update nightly. This reduces plan maintenance time and improves the accuracy of team information as the organization changes, resulting in less work with better outcomes.

Leverage Automated Workflows and Alerts to Drive Currency and Efficiency

Stop chasing your constituents and spending too much of your day tracking down people to get their plans and BIAs updated. Set update cycles to kick off on a schedule you set once and forget. Reminders will fire at intervals until work is complete. Workflows can be as simple or complex as you like, causing approvals to flow through a hierarchy that you configure. Analytics will show where there are deficiencies in keeping things up to date, so you can focus properly on the exceptions.

Quickly Respond to Ad Hoc Queries from Your Executive Team

Query the system on the fly in very powerful ways to respond to any inquiry. Explore the impact of the loss of applications, sites, business processes, and even key personnel with the Visual Relationship Browser. Provide analytics on the fly that meet virtually any request about your program or the company's preparedness.
