# Business Continuity

Transform Your Program and Be Ready for Whatever

Digital Transformation is an important goal that can lead an organization to make many important changes, but at its core, it means leveraging new technologies so you will be ready to change and evolve faster. As competition drives the speed of change to new levels, how do you choose the right business continuity solution that can keep up with your transforming organization. Product claims start to sound similar and make it challenging for you to differentiate, such as:

- Data-driven
- Easy to use, configurable
- Able to integrate with other systems
- Support of any methodology or standard
- Builds plans with ease
- Flexible reports and dashboards

How can you tell one solution from another so you can select wisely and be ready to tackle ongoing changes?

Enable, Adapt, and Transform
with the Leading Business Continuity Management Solution

Fusion Framework System provides the most complete and flexible set of tools to manage any size program. You can start building your information foundation and perform your first business impact analysis, then move into planning and exercises at your own pace. You can be confident that the platform can flex to your needs as you mature your program.

Visualize Your Organization

Capture your organization as structured data tailored to your unique attributes, and then watch the information come to life in the Visual Relationship Browser as you explore what-if scenarios and more.

Business Impact Analysis

Assess the most important risks and impacts and gather a foundation of company data to build strategies and plans. Be prepared to move beyond analysis to impact management.

Business Continuity Planning

Maintain plans of any type across your entire organization in a single data-centric system that focuses on being prepared to execute with facts that lead to great decisions rather than static plan documents.

IT Disaster Recovery Planning

Plan for a coordinated DR response between IT and the Business, synchronizing system data and planning to orchestrate recovery tasks.

Situational Intelligence

Map any part of your organization and overlay situational data such as weather. Declare an incident right from the map and activate faster than ever.

Exercise and Incident Management

A complete command and control solution for performing exercises and managing incidents that enables complete visibility through a single pane of glass, great decisions and rapid recoveries.

Crisis Response, Safety and Security

As part of overall Incident Management operations for the Enterprise integrated with your Emergency Notification System.

Risk Management

Grow into new risk agendas with a straightforward & practical system to manage a broad array of risks.

### Program Governance and Management

Manage the policies, plan maintenance processes and standards across all program components.

Fusion Framework Equips You for the Future

Digital transformation, whether small or large in scope, is an ongoing process that will require continuous changes to your business continuity program which you cannot always foresee but must be ready to adapt to. Only Fusion Framework can give you the tools you need to keep up with the speed of change required in the new world of digital transformation

More Time for What's Important – Fusion Framework can automate the administrative workload that is slowing you down, freeing up time to focus on strategic initiatives. Let the system distribute reports, update teams and rosters, and keep on top of your plan update and approval processes.

No Constraints – Fusion Framework has no limits. Configurable user roles, granular field-level security, an extensible information model, automated workflows, complete APIs, deep reporting and dashboarding provide you the most comprehensive and configurable business continuity system available.

Plan Management Infrastructure – Fusion Framework provides a central library where you catalog best practices, enforce standards, and enable what can be tailored. By basing your plans on an information foundation rather than a static planning tool, you will be in control of a truly effective planning infrastructure.

Command and Control Across Systems – Fusion Framework enables you to manage exercises and incidents effectively through a powerful incident command center. The Incident Dashboard is your single pane of glass that can be accessed anywhere on any device to drive action across your Emergency Notification and IT systems putting you in command and control.

Engage Your Entire Community – Fusion Framework allows you to extend access to communities of occasional users with mobile tools to engage the entire enterprise. Gather input from the front lines to understand the situation. Involve more people during exercises and incidents, assigning tasks and sharing important documents and other communications

Deep, Powerful, Easy Analytics – Fusion Framework's reports, dashboards and data analysis tools are intuitive and native to the platform, enabling you to answer ad hoc queries that come from the executive team on any topic. When you extend Fusion's information foundation, the new data is available everywhere immediately, on screens, reports, and via APIs.

Precision User Access for True Ease of Use – Fusion Framework provides you unlimited flexibility in user roles so you can tailor the online experience in an unlimited number of ways. Create easy to use experiences that fit your team that are simple, straightforward, and tailored to each user.

Quality of Integration – Fusion provides the most complete integration to the other systems related to your mission such as your ENS, your ITSM and CMDB, and your HR database. Bi-directional data synchronization and support for task orchestration during incidents are vital, while making sure you can change direction on which products you use without a major impact at any time.

Incomparable Platform – Fusion is built on the industry's number one application platform as a service, the Salesforce Lightning Platform. This means you can trust your resources will be there when you need them and that the solution will meet the security and scalability needs of the world's leading firms.

About Fusion Risk Management

Founded with a vision to transform how risk and business continuity programs are managed, Fusion Risk Management is dedicated to helping organizations improve integrated risk, business continuity, IT disaster recovery and crisis management programs. Based on the premise that an integrated information foundation and flexible tools can meet any program's needs, the Fusion Framework System designed to adapt and evolve to drive customer success.
