How Fusion helps with Other Program Areas

Other areas beyond the core functions of Business Continuity and Disaster Recovery include Operational Risk Management, Facility Risk, Vendor and Supply Chain Risk and more. If you have other areas that apply to your program but are not listed here, you can enter them in the text box at the bottom of this section. Fusion can help in the following ways and more:

Facility Assessments

How Fusion helps: Track facility adherence to standard environmental health and safety criteria. Tailor the scoring to your methodology. Provide surveyors the ability to enter assessments from site on a mobile device. (up to 30%)

Vendor Risk Assessments

How Fusion helps: From straightforward vendor management showing relationships to business processes, to full-blown third-party management with the ability for vendors to self-administer assessments for major time savings, Fusion can provide a fully integrated third-party management program. (up to 50%)

Supply Chain Risk Assessments

How Fusion helps: Specialized risk assessments to measure supply chain risk can be effectively done with Fusion's Third-Party Management capabilities. Identifying dependencies and criticality make the impact of vendors clear and will focus efforts for greater efficiencies to mitigate risk. (up to 30%)

Operational Risk Management

How Fusion helps: Fusion helps you move from spreadsheets into software for your risk management program by building a sensible approach to identifying risks and threats as well as controls that can be monitored. (up to 50%)

Emergency Response

How Fusion helps: Fusion will be a source of information for your emergency response teams who need to communicate with the business continuity team and the IT disaster recovery team. The information foundation will provide insight into the dependencies in the business and will help facilitate communications out when plan activation appears imminent. (up to 10%)

Emergency Notification

How Fusion helps: Fusion provides enterprise-class connectors to the top Emergency Notification Systems available. This provides efficiencies in maintenance, training, and actual message sending and response monitoring. All message activity can be executed from Fusion and is tracked as part of the overall incident record. (up to 30%)

Cyber Security / Data Breach

How Fusion helps: Plan your response to cyber-attacks and data breaches from both a crisis management and IT response all in Fusion. Create targeted responses with distinct plans of action. Perform crisis management using the Fusion incident management dashboard. Engage executives with the Fusion mobile app. Generate after action reports easily for remediation of issues. (up to 30%)

Data Integration

How Fusion helps: Fusion provides many ways to integrate tightly to important data sources, including out-of-the-box connectors, file transfer, data loading, personnel data integration, API access, etc. (up to 40%)

Other

How Fusion helps: Fusion Framework can be adapted to your methodology to improve things that could benefit from automated workflows, alerts, analytics and more. Conservatively, we only estimate a 10% gain from applying Fusion to your unique processes, but the benefits are usually far greater. (conservative estimate 10%)
